Breakthrough Technology for Ultimate Flexibility

[2]With state-of-the-art equipment comes state-of-the-art products. FEDCO utilizes up-to-date computers to allow for efficient transfer of data from one source to another. In-house software design allows FEDCO to be who we need to be. FEDCO is equipped with:

- High-speed CFD machines
- The latest processors, high amounts of memory, and ANSYS CFD software, allowing for high-speed design.
- In-house, customized software development, permitting FEDCO to develop as it requires, not as software dictates.
